

Sports Premium Review 2016/17

Old Park Primary was allocated £9795.00 Sports Premium funding in 16/17

How was the money spent?

Spend

£2045.00 was spent on a dedicated sports coach to deliver a range of extra-curricular clubs including multi-sports, football, table tennis and fun & fitness after school.

Impact

These sessions provided additional opportunities for children to access sports activity above those delivered on a voluntary basis by our PE co-ordinator.

The sports premium grant allowed us to continue to provide a wider offer that included Y1 – 4. This allowed pupils the opportunity to access after school sports, increased fitness levels and develop; physical, team work and communication skills. We will look to increase the offer next year to include Reception aged pupils.

A total of 240 accessed a full terms activity across the year. The aim next year is to extend the offer to reception aged pupils and maintain this level of participation.

Spend

£4000.00 was spent to appoint a sports coach who was able to deliver high quality PE across the school.

Impact

The coach was supported by the PE co-ordinator. He coach was able to provide all staff with continued professional development, they were able to observe quality teaching and be assisted with planning and assessment of PE. This prepared them for the change in the 17/18 academic year where teachers would once again take on the delivery of PE. Staff shared that they found that observations of the coach increased their confidence in teaching PE again.

Spend

£750.00 was spent on a service level agreement with a Primary PE specialist.

Impact

This enables our PE co-ordinator to network with other co-ordinators, access training and included subscriptions to afPE. The co-ordinator can contact the specialist at any time for support and guidance. This support provides continued professional development for our PE co-ordinator in this specialised subject. Her knowledge is then cascaded within the school through staff meetings and updates.

Spend

£2950.00 was spent on a range of resources for PE, outdoor play, forest school and breakfast club.

Impact

These equipment and facility improvements to the outdoor area have increased interest in physical activity during breaks times, this impact is added to thanks to the emphasis placed upon lunch staff to lead and encourage participation in specific activities.

Additional resources for PE have enabled the coach and teaching staff to differentiate lessons using a range of equipment.

Breakfast club have also expanded their activity away from just football. With more children trying new activities. Our new forest school has been made more accessible with barked pathways and interactive activities within the area to enable the forest school sessions to be more active.

Spend

£50 was spent on travel and competition fees.

Impact

Selected children have participated in two swimming galas and football tournaments in KS2 and all children participate in our annual competitive sports afternoons. Parents attend to support and we hold three events to maximise participation across the school.
